

George Sprehn has been involved with the Geographic Information System (GIS) discipline for over 25 years, with emphasis on spatial analysis, problem solving, cartography, and geodatabase management. Since 2014, as a GIS Analyst for EarthBalance®, Mr. Sprehn has managed a GIS department throughout all aspects of GIS project scheduling, data acquisition, data management, map production and presentation, equipment inventory, and reporting. Mr. Sprehn successfully employs GIS, GPS, and spatial analysis methodologies to analyze local and regional-scale ecosystem projects. Mr. Sprehn holds B.A. in Geography and Master of Geographic Information Systems (MGIS) degrees.

When not helping to balance the needs of people with the health of natural environments, George may be found hunting fossils on the Peace River, wading a slough in South Fort Myers, or visiting grandchildren in the Massachusetts region.

George is currently serving the SWFAEP chapter in an At-large Membership position and chapter representative on the FAEP board.
